have over 1700 in material and much more in time making it into what it is. has a 71 vw front end with brand new disc brake conversion with stainless steel brake lines and master cylinder all hooked up and works but never ridden on. (over \$600 alone for just that) also includes a brand new agm battery that costed me 140 bucks at the local bike shop. alot of extras as well including the original motor and swing arm that might be fixable, (needs a seal to fix and oil leak) a 63 vw front end complete as well just needs wheel bearing. make it your way or throw a different bike into the frame and go. have a title and keys that go with the frame asking \$1000 firm at this time. any interest hit me up. located in South bend, IN 46614. can possibly deliver for extra money. can include a 8'x14' flat trailer for another 750.

931 lancaster drive
